Re: RoHS Certification for Converting & Specialty Papers Products
(IP C1S Hi-Brite [Grades 9981 and 9982] and IP C1S Gloss [Grades 9983 and 9989]; Courtland,
Alabama mill)

Dear Ms. Garceau:

Please be advised that International Paper's C1S Hi-Brite and C1S Gloss products comply with European Union Directive 2002/95/EC on the restriction of hazardous substances in electrical and electronic equipment, or RoHS.

We use no lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBBs) or polybrominated diphenyl ethers (PBDEs) in the manufacture of C1S Hi-Brite and C1S Gloss, and none of these materials is added to the finished product.

Low levels of the listed heavy metals will be present because trees take them up from forest soils. Specifically, lead, cadmium, mercury, and chromium (total) are each present at less than three parts per million. Therefore, these products comply with the total heavy metals limit of 100 parts per million recommended by CONEG and required by EU Directive 94/62/EC and CEN standard CR13695-1. No PBB or PBDE will be in our C1S Hi-Brite and C1S Gloss as shipped or delivered.
