Dear Mr. Richards:

You have requested information on whether the bleached board provided to your company by Georgia-Pacific Bleached Board contains Polybrominated Diphenyl Ethers (PBDEs) flame retardants including Pentabrominated diphenyl ether (pentaBDE); Octabrominated diphenyl ether (octaBDE); and Decabrominated diphenyl ether (decaBDE).

Georgia-Pacific Bleached Board manufactures bleached board at Brewton, AL and, based on our review of all the MSDS from substances utilized in their manufacture, PBDE is not used in or present in these products.

We trust this satisfies your request.

Sincerely,

A handwritten signature in black ink that reads 'Cindy Cooley'.

Cindy Cooley, P.E.
